Photovoltaic panels solar installation quote

How much does a solar panel installation cost?

The average cost of a 10.8 kW solar panel installation on EnergySage is $20,948after federal tax credits. You'll probably save anywhere from $28,000-$120,000 over 25 years by going solar. Solar panels are just 12% of the total cost of a solar panel installation.

How much does a solar panel cost per watt?

Solar panel cost per watt ranges from $2.50 to $3.50on average,including installation costs. While larger panel systems have a higher upfront cost,they produce more power and offer a lower average cost per watt. Many states and municipalities offer rebates and tax incentives.

What factors influence the average cost of solar panel installation?

The factors influencing the average cost of solar panel installation include hard and soft costs. Hard costs include the physical equipment like racking,panels,inverters and batteries. Soft costs include sales tax,installation labor,permitting,company overhead and marketing.

What does a solar quote include?

Most solar quotes feature three numbers: The contract price of the system, the value of incentives, and the net cost of the system after incentives. What solar quotes don't typically feature is an itemized cost breakdown of the equipment, labor, and other soft costs.

Are solar panels worth it?

Solar panels can generate major savingsif you're trying to reduce your electricity costs,carbon emissions or both. The primary factor in determining whether or not solar panels are worthwhile for you is the cost you're currently paying for electricity. The higher your electricity costs,the more a solar panel system will save you in the long run.

How much does solar panel maintenance cost?

Solar panel maintenance costs: Solar panels have no moving parts,so very little maintenance is required. However,getting routine professional solar panel cleaning and inspections every two years can keep your system in tip-top shape. These solar maintenance costs can be about $300 per session.
