

What is the payback period for solar panels?

The payback period for solar panels is the time it takes to break even on your investment. This can be calculated by dividing your initial cost by the annual savings you experience on your utility bill. Most households should expect payback for solar panels within eight to 13 years.

Do solar panels add value if you move?

However, adding a solar system can still benefit you financially if you move. According to a few studies, solar panels increase your home's value by about 4%. Just be wary of leasing solar panels if you think you might move. Leases are typically long-term and can be difficult to cancel, making it more challenging to sell your home.

Do commissions affect solar panels?

Commissions do not affect our editors' opinions or evaluations. How many years do you have to pay back solar panels? What is the average break-even time for solar panels? Does solar pay for itself? What happens after I pay off my solar panels? Confused about the payback period for solar panels?

Will solar panels save you money?

Learn how to determine your solar payback period and find out when your investment will start saving you money. Solar panels can save you a lot of money on electricity, and might even make you money if you can sell energy back to the grid. Solar panels are an expensive investment.

How long do solar panels last on a roof?

Solar panels on your roof should last for 25 years, and by looking at the total return on investment, they can be compared to other ways to invest your money. If you'd rather skip the long explanations and math equations, you can calculate the payback period for your specific home now by using our solar panel payback calculator:

Do solar panels reduce your electric bill?

For example, if you spend \$16,000 on a solar panel system, then get a federal tax credit of \$4,800, the cost after incentives is \$11,200. Then if the solar energy your panels make reduces your electric bill by \$1,500 per year, your payback period would be about 7.5 years, assuming electricity rates don't increase.
