

What are solargaps smart blinds?

SolarGaps smart blinds are the first blinds that automatically track the sun and generate electricity from its energy while keeping your apartment or office cool.

Are solargaps blinds a good investment?

With the ability to generate enough power to run 30 LED light bulbs, SolarGaps blinds are the perfect combination of IoT smart home device and intuitive renewable energy source. This is a no-brainer purchase for anyone interested in jumping on the road to energy independence without forking over the dough for solar panels.

Do solargaps blinds fit a Google Home?

Whether it's Google Home, Amazon Echo, Nest Thermostat, or Philips Hue Light Bulbs, if your plan is to create the ultimate smart home, SolarGaps blinds fit right in. Finally, these blinds are super-easy to install. Just mount SolarGaps on the wall over your windows with the brackets provided.

Why should you choose solargaps facade blinds?

SolarGaps facade blinds automatically adjust the angle of its blinds for the most effective shading performance and solar power production. Our smart blinds are mounted on the outside of the building and serve as a heat shield which helps to maintain a comfortable room temperature.

Do solar blinds have inverters?

The inverter is sold separately but is provided already attached to the system so that you only have to plug in the SolarGaps system before the solar energy will power your devices and home appliances. The high-quality inverters we chose for our smart solar blinds are practically silent and do not produce any noise emission.

Which smart home devices are compatible with solargaps?

Secondly, SolarGaps are compatible with most IoT smart home devices and digital assistants. Whether it's Google Home, Amazon Echo, Nest Thermostat, or Philips Hue Light Bulbs, if your plan is to create the ultimate smart home, SolarGaps blinds fit right in.
