### What is the energy transition in Poland?

Wholesale energy prices in Poland compared to other EU countries remain very high, and the economy's dependence on imported fossil fuels is growing rapidly. In the latest, seventh edition of the "Energy Transition in Poland" report, Forum Energii presents the state of transition play and a broader look at the overall process.

#### How much hydrogen does Poland produce a year?

Poland produces 1 million tonnesof grey hydrogen every year and with the EU targets in place,42% of this needs to be turned into green hydrogen. To hear more about hydrogen opportunities in Poland,watch the video. Radoslaw Gnutek of Polenergia S.A. speaks about hydrogen development and opportunities for the energy transition in Poland.

### Does Poland have a helmsman for the energy transition?

The energy transition in Poland has no helmsman. There is no single centre to manage the process, so the changes taking place are chaotic. Poland has never offered a comprehensive vision for the decarbonisation of the economy or a plan to reduce dependence on energy resources imported from abroad.

#### Why is energy production increasing in Poland?

At the same time, energy production from natural gas increased, by more than 40%. This is a result of falling fuel prices and the flexibility of gas generation. Wholesale energy prices in Poland compared to other EU countries remain very high, and the economy's dependence on imported fossil fuels is growing rapidly.

### What are Poland's energy and climate policies?

Poland's energy and climate policies are primarily outlined in two documents: the National Energy and Climate Plan(NECP), which is mandatory for all countries in the European Union (EU), and the country-specific Energy Policy of Poland 2040 (EPP2040).

#### What happened in Poland's energy transition in 2023?

Poland's energy transition is progressing, and 2023 was a year of real records. Although coal remains the main source of electricity production, its share in the mix fell to an all-time low of 60.5%, down 10 p.p. from a year earlier. Production from RES reached 27% for the first time.
