

What is Portugal's energy import dependency?

In 2019, Portugal's energy import dependency was 74%, one of the highest levels among IEA member countries. Portugal has made progress on reducing energy import dependency by increasing the share of renewables in the energy supply, especially for electricity.

How is energy used in Portugal?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

How has Portugal changed its energy policy?

Despite a difficult economic climate, Portugal has continued to develop and reform its energy policies. These changes have resulted in greater economic activity in the energy sector, increased renewable energy deployment, further market liberalisation and

Does Portugal have a high energy demand?

Portugal has also achieved a high level of electrification. In 2019, electricity covered 25% of total final energy demand, 56% of building energy demand and 25% of industry energy demand. Portugal has also achieved high shares of renewable energy, which covered 30.6% of gross final energy demand in 2019.

What is Portugal's Energy Plan?

Portugal's plan dedicates notable funding to the energy sector, with funding for sustainable mobility, energy efficiency, renewables, decarbonisation and bio-economy.

How much energy does Portugal import from Russia?

With the invasion of Ukraine by Russia, most of Europe has fallen into disarray trying to mitigate an energy crisis. However, while the majority coming into the EU came from Russia, Portugal only imports 5% of its energy from the country. Nevertheless, this brought to light that Portugal relies heavily on imported energy.
