

EDP Renováveis (EDPR) announced on Thursday the grid connection of its first hybrid project globally and the first in the Iberian Peninsula, in Sabugal, which combines wind and solar power generation in a single location.

A "hybrid power plant", controlling the grid for an entire island and its inhabitants, will be created with the addition of a management and control platform from energy storage system integrator Greensmith.

EDP, through EDP Renováveis, has commissioned Portugal's second hybrid park that combines wind and solar energy in the same location, practically doubling the capacity for renewable ...

EDP, through EDP Renováveis, has commissioned Portugal's second hybrid park that combines wind and solar energy in the same location, practically doubling the capacity for renewable electricity production in a single site.

EDPR recently inaugurated another hybrid power plant in Portugal. Located in Penela and Ansião, in the country's Central Region, the project combines wind and solar power generation on one site--the second of its kind to come into operation in Portugal.

The renewables unit of Portuguese energy supplier EDP has commissioned Portugal's second solar-wind hybrid project. It has installed 36 thousand bifacial panels alongside 13 wind turbines to...
