

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

Why is energy demand increasing in Syria?

Energy demand in Syria has been increasing at a rate of roughly 7.5% per year due to the expansion of the industrial and service sectors, the spread of energy-intensive home appliances, and state policies that encouraged wasteful energy practices, such as high subsidies and low tariffs.

How many power plants were destroyed in Syria?

Violence and looting destroyed three major power plants in Syria between 2015 and 2017: the Aleppo Thermal Station, Zaytoon in Idlib, and al-Taim in Deir Ezzor. Pre-war, these three plants accounted for almost one-fifth of Syria's total generation capacity.

How many barrels of oil does Syria produce daily?

Syria produced 400,000 barrels per day (64,000 m<sup>3</sup>/d) in 2009 and exported about 150,000 barrels per day (24,000 m<sup>3</sup>/d). The country's oil reserves were estimated to be 2.5bn barrels in 2010. The Syrian Petroleum Company (SPC) is a state-owned oil company established in 1974.

In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society. Demand grew by roughly 7.5% per year during this decade, fueled by the expansion of Syria's industrial and service sectors, the spread of energy-intensive home appliances, and state policies (i.e. high subsidies and low tariffs) that encouraged wasteful energy practices. Syria's inefficient transmission infrastructure compounded these probl...

Energy in Syria is mostly based on oil and gas. [1] Some energy infrastructure was damaged by the Syrian civil war. There is high reliance on fossil fuels for energy in Syria, [2] and electricity demand is projected to increase by 2030, especially for industry activity such as automation. [3] However, conflict in Syria has caused electricity generation to decrease by nearly 40% in ...
