PowerHub is the platform our clients use to manage their assets, whether they be renewable energy assets or any other infrastructure or business asset. The platform offers a variety of features that allow you to centralize and organize your asset's key information and data to ensure asset intelligence. By enabling automated monitoring, sorting ...

A PowerHub é uma plataforma de gerenciamento de dados de energia que garante controle e informações precisas para a sua operação. Desenvolvido pela Way2, empresa especialista em soluções tecnológicas para o setor de energia que, há mais de 18 anos, está presente em todos os pontos da cadeia energética do país.

Powerhub enables operators to directly control power plants in real-time, either on-site or virtually, across large fleets. Depending on project requirements, Powerhub can be configured for issuing direct power commands from an on-site control room or if preferred, securely update operational parameters from a remote location.

PowerHub provides the necessary solutions to manage and optimize renewable energy assets efficiently. As the renewable energy sector continues to expand, taking advantage of the right software will help asset managers stay ahead in a competitive market. We're here to help -- request a demo!

You can contact the PowerHub team via phone or email as provided below, or, you can always contact your Customer Success Specialist directly. To access PowerHub's Contact Us page, click the icon in the MyBar.. On our contact page, you can reach us via email or phone for feedback and support.

Jon Houle, Product Manager at PowerHub, shares insights on the new GADS reporting requirement. Excerpt: This article delves into the specifics of the GADS reporting obligations, their implications for renewable energy stakeholders, and how PowerHub's innovative tools can streamline compliance and data management in this new regulatory ...

Toronto, Ontario, Canada - May 31st 2023 - PowerHub, a software platform supporting renewable energy asset managers, is proud to announce the launch of its latest product enhancement: an innovative software capability for Community Solar invoicing and subscriber management. This ground-breaking addition to the PowerHub product suite aims to ...

PowerHub makes Analytics easy. Bring in data from multiple sources, centralize information easily to track & report on how your portfolio is performing accurately. Connect to data sources automatically. Format powerful dashboards & reports. ...
