

How does a virtual power plant work in the Faroe Islands?

In November 2012 the Faroe Islands became the first place in the world where a virtual power plant was used to recreate balance in an island power system by decoupling large industrial units in less than a second from the main power system, thereby avoiding blackouts.

Should the Faroe Islands be self-sufficient?

Isolated in the North Atlantic Ocean, the Faroe Islands need to be self-sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries. SEV operates six hydro power plants, three thermal power plants, three wind farms and one solar power plant.

Why is Sev the main power supplier in the Faroe Islands?

SEV is the main power supplier in the Faroe Islands. We operate on 17 of the 18 islands that constitute the Faroe Islands. Isolated in the North Atlantic Ocean, the Faroe Islands need to be self-sufficient in terms of electricity generation as the Faroese electrical grid is not interconnected to neighbouring countries.

How many wind farms are there in the Faroe Islands?

Furthermore, external suppliers operate one wind farm and one biomass plant. Total installed capacity in the Faroe Islands is 163 MW and total power generation in 2019 was 386 GWh. Max demand was 63.1 MW in November 2020. In 2018, 49% of power generation came from renewable sources, i.e. hydro and wind power, respectively.

What is Neosun PowerHUB?

NEOSUN PowerHub is the lowest cost source of clean and reliable off-grid power for remote locations. It is a stand-alone, turn-key system that combines solar energy production with integrated energy storage in a readily deployable and easily movable form that's ideal for remote power applications.

Where are the Faroe Islands located?

The Faroe Islands are an archipelago within the Kingdom of Denmark between the Norwegian Sea and the North Atlantic Ocean. The total area is 1,400 km<sup>2</sup> with a population of 50,000. The islands have a current installed renewable generation capacity of 60 MW from hydro and wind resources, totaling almost 60% of the island's power production.

PowerHub Front Ports. 120V Tamper Resistant Outlet, 10Amp\* Left USB Port, 2.1 10A Circuit Breaker; Right USB Port, 1.0 120V Power Outlet, 10Amp\* \*International Plug Configurations Available; Outside Bezel Dimensions 6.85" x 3.07" (174 x 78 mm) Wall Cut-Out Dimensions 5.35" x 2.87" (136 x 70 mm)
