Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. ... Liechtenstein: Energy intensity: how much energy does ...

In recent decades, renewable energy efforts in Liechtenstein have also branched out into solar energy production. Most solar energy is generated by photovoltaic arrays mounted on buildings (usually roofing), rather than dedicated solar power stations. Currently, the largest photovoltaic array in the country is the one atop the Grödenmoos ...
