

# Purchase of solar photovoltaic panels payment

What financing options are available for solar panels?

Power purchase agreements... Many \$0-down financing options are available for going solar, including ownership (i.e., solar loan) or third-party-owned (i.e., leases) solutions. Many homeowners looking for an easy, low-cost, maintenance-free way to install a solar panel system move forward with a power purchase agreement (PPA).

Can you buy solar panels with a loan?

Financing via a solar loan is a path to ownership, while third-party ownership (TPO) options include solar leases and PPAs. You can also purchase your panels outright with cash, which means no payment plan or financing is necessary.

How do I pay for solar panels?

You can pay for solar panels using personal home improvement loans, cash-out refinancing, home equity loans, and Home Equity Line of Credit. These options will often have higher interest rates, lower origination fees, and shorter term lengths than solar-specific loans and may use your home as collateral.

Do solar panels cost a lot?

The total bill for solar panels includes costs both hard (the panels and related equipment) and soft (installation). Solar financing options are available to fit any budget, including solar loans, lease or power purchase agreement. Installing solar panels can lower energy bills and even improve your home's selling potential.

What is a solar power purchase agreement (PPA)?

Financing a solar panel system with a power purchase agreement, or a PPA, is similar to leasing or "renting" a solar panel system. Simply put, a solar company or PPA financier covers all the costs of buying solar equipment and installing it on your roof.

Should you finance solar panels through a contractor?

Financing through the solar panel installation company may be the best option if you: Want the financing and installation through the same company. Would pay less than with a personal loan or home equity option.   
#187; MORE: Should you finance solar panels through your contractor? How much can you save with solar panels?
