Higher Wire has developed a line of drop-in lithium batteries to replace the existing lead acid system. Weighing only 500 - 800 lb for 15 - 25.6 kWh of power, our batteries can be swapped in as little as a few hours using the existing Anderson connectors and requiring only one additional connection for the included communication cable to the ...

Our 100 amp-hour* (1,200 watt-hour), 12-volt lithium iron phosphate (LiFePO4) battery is the perfect replacement for traditional lead-acid in deep cycle applications that demand long life, low weight and high performance.

Lithium-ion battery fires can be dangerous and costly, as demonstrated by the APS fire in Arizona. While these batteries offer many benefits, it is important to take appropriate precautions to minimize the risk of a fire. By following best practices for storage, handling, and maintenance, and by installing fire suppression systems where appropriate, the risk of a ...
