

What is a radioisotope storage cabinet?

The Radioisotope Storage Cabinet is designed for safely storing radioactive materials. It features 12 key-locked drawers. Each drawer is easily removed for cleaning or decontamination. A card slot identifies contents. View our complete range of Lead-Lined Storage Cabinets.

What is a shielded radioactive sample storage cabinet made out of?

The frame, tabletop and side boards of the shielded radioactive sample storage cabinet are made out of stainless steel to give a clean look and provide cleanability. This shielded radioisotope storage cabinet has 25 mm (1") lead shielding on all sides and in the front panels of the drawers.

How do you store radioactive materials?

Storage of radioactive materials requires the use of radiation shielding. The radioactivity can be shielded by placing the radioactive materials into a shielded containment such as a lead shielded cabinet, lead shielded safe or a lead shielded container.

What is a radioactive storage system?

It allows for the containment of all-energy radioactive sources used in conventional nuclear medicine services and PET units. They are suitable for the storage of constancy sources, which are necessary for quality control of activity measuring devices in shielded hot cells, such as dose calibrators.

How do you store radioisotopes & non-sharps radioactive waste?

Safely stores radioisotopes and non-sharps radioactive waste. The Waste and Storage Cabinet performs two functions. Radioisotopes can safely be stored in drawers, while the cupboard section is for the storage of non-sharps radioactive waste. Drawers are easily removed for decontamination.

How can radioactive materials be shielded?

The radioactivity can be shielded by placing the radioactive materials into a shielded containment such as a lead shielded cabinet, lead shielded safe or a lead shielded container. Nuclear Shields is a radiation shielding manufacturer and designs shielding solutions for storing radioactive materials.

Ultraray's Lead-Lined Laboratory Cabinets ensure safe, secure storage with customizable lead thickness for radiopharmacy and nuclear medicine. 1-877-338-6857 | info@ultraray . About; Industry Solutions; ... Discover Ultraray's Lead-Lined Laboratory Cabinets, the ultimate in safe radioactive material storage for nuclear medicine and ...

MarShield Designing & Manufacturing Custom Lead Cabinet MarShield was approached by a Senior Nuclear Medicine Technologist/Radiation Safety Officer & Stress Lab Manager from Western Canada 's premier cardiology clinics to design and manufacture a custom cabinet with a vertical storage location for flood

sources and phantoms. The customer required the cabinet to ...

Nuclear Shields manufactures lead-lined storage cabinets and lead-lined containers for radioactive sources. These cabinets can be used for various applications and can be custom made to your dimensions, amount of drawers ...

HE1007852 - Radioactive Storage Cupboard - Radioactive storage cabinet for use with low level radioactive materials. Manufactured from 1.2mm Zintec coated sheet steel for excellent corrosion resistance. Spot welded seams with gas welded corner joints. Dimensions: (H)380mm x (W)380mm x (D)380mm One fixed, half depth shelf and plastic contents spray.

The Waste and Storage Cabinet performs two functions. Radioisotopes can safely be stored in drawers, while the cupboard section is for the storage of non-sharps radioactive waste. Drawers are easily removed for decontamination. The cupboard section includes a shielded port and a 16 gallon polyethylene container.

Modular shielded radioactive sample storage cabinet with six drawers. The dimensions of our modular shielded cabinets are exactly the same, which means all our lead lined cabinets can be placed next to each other and on top of each other, enabling you to easily upgrade your hot lab setup whenever there is a budget. The skirting board and drawer fronts are made out of HPL, ...

Storage Cabinet for Radioactive Materials-This cabinet is designed to store low level radioactive materials. It has a secure, concealed locking system and louvred door. Inside are one fixed half-depth shelf and a plastic contents tray. Size: ...

The Lead-Lined Radioisotope Storage Cabinet is designed for safely storing radioactive materials. It features 12 key-locked drawers. Each drawer is easily removed for cleaning or decontamination. A card slot identifies contents.

The frame, tabletop and side boards of the shielded radioactive sample storage cabinet are made out of stainless steel to give a clean look and provide clean-ability. This shielded radioisotope storage cabinet can be shielded with 6, 12.5 or 25 mm of lead shielding on all sides and in the front panels of the drawers. These cabinets can easily ...

MarShield manufactures a wide range of Standard or Custom Designed Lead Lined Cabinets suitable for Nuclear Medicine or Radiochemistry laboratories. MarShield has worked extensively with architects, engineers, contractors and end-users like doctors, hospitals, laboratories, and medical & veterinary clinics to ensure that our designs are ...

MarShield manufactures a wide range of Standard or Custom Designed Lead Lined Cabinets suitable for Nuclear Medicine or Radiochemistry laboratories. MarShield has worked extensively with architects, engineers, contractors and ...

Our Decay Cabinets are designed for storage of radioactive materials or decay radioactive waste materials. Heavy-duty adjustable shelves incorporated into the cabinet allow the waste to be placed directly onto them (short or long term) until it can be safely disposed of. Internal dimensions of the cupboard are based

Installing the shielded radioactive source storage cabinet Installation is quick and easy due to the smart design. By using a vacuum lifter and a roundsling, compact lead shielding plates can be easily placed into position. Installing the shielded radioactive source storage cabinet will only take one day with the correct handling equipment.

A lockable, grey polyester coated safety cabinet, suitable for the storage of school radioactive sources and materials. This cabinet is manufactured from 1.2mm coated sheet steel, with a textured stove enamel finish, spot welded seams, and gas welded corner joints.

The utility model belongs to the technical field of nuclear radiation protection, and particularly relates to a medical radioactive source storage cabinet. The technical scheme includes that a protection door is arranged on the front side face of the medical radioactive source storage cabinet, at least one radioactive source drawer is arranged inside the medical radioactive ...

Nuclear Shields manufactures lead-lined storage cabinets and lead-lined containers for radioactive sources. These cabinets can be used for various applications and can be custom made to your dimensions, amount of drawers and more.
