

What is Eswatini's energy revolution?

Eswatini's energy revolution is a testament to its dedication to sustainability and self-sufficiency. As Eswatini strides into the future with renewable energy, the convergence of local innovation, international collaboration and growth-oriented policies promises to illuminate every corner of the nation.

Is Eswatini a sustainable country?

A nation that has long relied on neighboring South Africa and Mozambique for unsustainable fossil fuel-based electricity imports, renewable energy in Eswatini is quickly diversifying. The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030.

What is the main energy source in Eswatini?

Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini. The EEC operates four hydropower plants, constituting 15% of the country's electricity production and plans to bolster the existing infrastructure.

Why is Eswatini a beacon of inspiration for other developing countries?

As Eswatini strides into the future with renewable energy, the convergence of local innovation, international collaboration and growth-oriented policies promises to illuminate every corner of the nation. This positions Eswatini as a beacon of inspiration for other developing nations navigating toward a self-reliant future.

Why is Eswatini electrified?

The electrification of Eswatini promises its energy-deprived citizens more than just basic household power. It heralds a new era of economic expansion, immediately offering job prospects in construction and laying the groundwork for internet-driven startups to flourish.

What does Eswatini's COP26 pledge mean for Swazi energy?

The transformative journey culminated at the COP26 conference, where Eswatini committed to an ambitious 50% surge in renewable energy production by 2030. This pledge signifies a crucial step toward Swazi energy independence, bridging the stark urban-rural economic divide and promising new employment and educational opportunities.

By investing in renewable energy and expanding electric connectivity, the government aims to liberate unelectrified Swazi citizens from the energy poverty trap, enabling them to realize their untapped potential. These ...

Eswatini: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen

country across all of the key metrics on this topic.

6 ???&#0183; The policy brief presents a road plan for the Kingdom's Just Energy Transition. It seeks to link growth and development with Eswatini's Nationally Determined Contributions (NDC) ...

By investing in renewable energy and expanding electric connectivity, the government aims to liberate unelectrified Swazi citizens from the energy poverty trap, enabling them to realize their untapped potential. These are the four key sectors of renewable energy in Eswatini that are receiving strategic government investments and support.

3 ???&#0183; The outcomes of the workshop mark a crucial step in the ongoing fight against energy poverty, positioning Eswatini to pursue a more equitable, inclusive, and sustainable energy future. The Ministry and Empower Southern ...

Prince Lonkhokhela, the Minister of Natural Resources and Energy said Eswatini aims to increase her electricity generation capacity through the use of sustainable and environmentally friendly technologies, in line with energy transition targets.

Prince Lonkokhela, the minister of Natural Resources and Energy, announced at the event that Eswatini is set to increase its electricity generation capacity by 241 megawatts as of July 2026 in an ambitious goal for ...

This policy brief examines the complex interplay of factors shaping Eswatini's energy landscape, from security to coal development's environmental, economic, and social implications. It outlines a roadmap for a Just Energy Transition in the Kingdom.

6 ???&#0183; The policy brief presents a road plan for the Kingdom's Just Energy Transition. It seeks to link growth and development with Eswatini's Nationally Determined Contributions (NDC) pledge to generate 50% of its energy from renewable sources by 2030, as well as COP28's goal of transitioning from fossil fuels to renewable energy by 2048.

Prince Lonkokhela, the minister of Natural Resources and Energy, announced at the event that Eswatini is set to increase its electricity generation capacity by 241 megawatts as of July 2026 in an ambitious goal for universal, affordable, reliable and modern energy by 2030. As highlighted during the forum, this presents excellent opportunities ...

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

o To strive to provide all households with access to modern energy by 2030. o To develop 40 MW Solar PV and 40 MW Biomass project by 2024 o To ensure energy security by 2026 (baseload generation capacity)
