

Clean and Sustainable Energy: By using the EnergyBox, you contribute to a greener future while also saving money on costly energy bills. Each system offsets approximately 36 kg of greenhouse gas emissions per day compared to existing fuel-based substitutes. **Power Sources:** The EnergyBox can be powered using solar energy or direct grid electricity.

So, reducing energy consumption can inevitably help to reduce emissions. However, some energy consumption is essential to human wellbeing and rising living standards. Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product.

Place a rental request, make payment (via Mobile Money, Cash or Bank Transfer) and pick up your Reeddi Capsule. You now have power in your hands to meet your daily energy needs. Rent-To-Own. Learn More. Got Any Question? We are always available to address any inquiries you may have. Kindly contact us if you have any questions.

Reeddi already serves over 600 households and businesses monthly across Nigeria. The increased profile from being named a 2021 Finalist, has seen huge increases in demand for their capsules, a 6X increase in sales, and allowed them to launch a new solar panel rental scheme to keep small businesses powered up for longer.
