

Why choose REFU energy storage systems?

REFU energy storage systems will complement and enhance Pramac's current hybrid energy storage product offerings and further accelerate the development of new technologies. Pramac is committed to providing commercial and industrial consumers with leading solutions for their adoption of renewable energy.

What does refu do?

REFU develops and integrates synergistic components for stationary energy solutions and thus offer a common platform for the 'energy system revolution'. We bundle our competencies in the areas of high-performance electronics in order to develop economical, efficient and environmentally conscious solutions.

What is REFUstor?

REFUstor is a subsidiary of REFU Elektronik GmbH, headquartered in Pfullingen, Germany. It was established in 2021 and focuses on developing fully integrated, ready-to-use energy storage systems and stand-alone storage inverters along with an energy services management platform.

What happened to REFU Storage Systems?

REFU Storage Systems' highly efficient and extendable storage systems paired with their energy management solution have provided businesses the opportunity to build their own energy ecosystem and reduce electricity costs. The transaction closed on February 1, 2023 with the details of the deal not being disclosed.

Can refustor be used with existing PV systems?

The AC-coupled REFUstor can be easily integrated with existing PV systems. The highly modular solution allows it to be used in systems from 50 kW up to MWs in size to meet the demands of both energy and power applications. The REFUcontrol BC-10 EMS is our solution, completing our REFU inverter that you can build your own Battery System.

What makes refu a successful company?

The key to our success lies in our ability to combine the expertise in controllable power electronics with customer-specific designs and production. REFU is a part of the multinational, diversified PRETTL Group.

The REFUcontrol BC-10 EMS is our solution, completing our REFU inverter that you can build your own Battery System. It controls for self-consumption, peak shaving and time-controlled charging. It comes with an data edge controller automatically connected to a cloud-based portal - at no extra usage fee.

REFUstor's highly efficient and extendable storage systems paired with their energy management solution provide businesses the opportunity to build their own energy ecosystem, while simultaneously reducing their electricity costs.

Long-lasting, Environmental and Economical - REFU Inverter. REFU Inverts have proven itself in more than 300.000 installation - every day. The combination of a PV or a Battery-Storage installation and a REFU Inverter will allow you to ...

the proven inverter platform of the actual REFU generation. They are specially designed for all high-performance batter-ies and their different cell chemistries. With a rated power of up to 88kW at 400 VAC it is ideal for use in C& I applica-tions such ...

REFUstor"s highly efficient and extendable storage systems paired with their energy management solution provide businesses the opportunity to build their own energy ecosystem, while simultaneously reducing their electricity costs. The transaction closed on February 1st, 2023. Terms of the deal were not disclosed. ###
About Pramac

Long-lasting, Environmental and Economical - REFU Inverter. REFU Inverts have proven itself in more than 300.000 installation - every day. The combination of a PV or a Battery-Storage installation and a REFU Inverter will allow you to cover your energy requirement with self-produced and clean energy.

Generac Power Systems, Inc. (NYSE: GNRC), today announced the acquisition of REFU Storage Systems GmbH ("REFUstor"), a developer and supplier of battery storage hardware products, advanced software and platform services for the commercial and industrial market, from REFU Elektronik GmbH.

REFUstor"s highly efficient and extendable storage systems paired with their energy management solution provide businesses the opportunity to build their own energy ecosystem, while simultaneously reducing their ...

Digitalization is now finding its way into the energy market. For PRAMAC Storage Systems GmbH (formerly REFU Storage Systems GmbH, this means developing new software, hardware, and cloud solutions in addition to innovative power electronics.
