HOUSTON, Dec. 5, 2023 /PRNewswire/ -- Honeywell today announced it will provide VIElectron, a CB Loranger Company, its first installment of battery energy storage solutions (BESS) to six ...

Today, the U.S. Department of Energy's (DOE) Energy Transitions Initiative Partnership Project (ETIPP) is announcing nine new projects with remote and island communities building local energy systems that are ...

Small and remote islands, which often have abundant renewable energy resources, have the potential to become hubs of clean energy innovation. While a study performed on 36 small island economies showed that the majority generated less than 10% of their electricity from renewable sources, encouraging trends are visible.

In ETIPP's first three cohorts, 32 communities have already been exploring resilient and renewable energy solutions, such as developing microgrids for island communities, seeking paths to carbon-free commercial fishing, understanding options for integrating electric vehicles, and improving renewable energy generation and storage to reduce ...

The US Department of Energy (DOE) has announced plans to work with 12 remote and island communities around the United States to help them move to clean power, lower energy costs, and...
