

The Essence of a Just Energy Transition: Just energy transition means that Mongolia needs to shift from fossil fuels to renewable energy sources in a way that is fair and inclusive, ensuring that all communities benefit and no one is left behind.

In Mongolia, the installed capacity of renewable energy production reached 286 MW, accounting for 18.1 percent of the total installed capacity and 9.2 percent of production. Due to the difference in tariffs, 27 percent of the total sales revenue is allocated to these sources.

Through the grant program, USAID will provide grants to eligible think tanks, consulting firms, non-governmental organizations, private companies, research institutions, and other relevant organizations to implement interventions to support energy sector transition.

GCF in Mongolia: Towards a climate-resilient future. 16 May 2019 / The Green Climate Fund (GCF) is assisting Mongolia in its transition to renewable energy by catalysing local private sector capital to enable local solutions to climate change and open markets for big investors in renewable energy.

This brief summarizes the 2024 solar and wind power policy landscape in Mongolia, which possesses significant wind and solar energy resources, but requires more development and investment to help the country ...
