Renewable energy solutions Maldives

World Bank-financed projects ASPIRE and ARISE support Maldives" energy transition by installing more than 53.5 megawatts of solar capacity and 50-megawatt hours of battery storage. This will reduce Maldives" annual import bill by about \$30 million, with a project lifetime saving of \$756 million over 25 years.

The Renewable Energy Roadmap for the Republic of Maldives, developed by the International Renewable Energy Agency (IRENA) at the request of the Ministry of Environment and Energy of the Republic of

Maldives, identifies opportunities and challenges in the country's transition to large-scale renewable energy

use.

The Maldives" net-zero journey is not over yet, but making tremendous progress: the programmatic approach

set the Maldives on a sustainable path. Already a leader in tourism, the country is now rapidly transforming

into a renewable energy powerhouse as well.

This roadmap identifies the key barriers to renewable energy deployment in the Maldives. The objective of the
