

Supported the development of the National Energy Strategy, which Kosovo's Assembly passed in March 2023. Competitively solicited 100 megawatts of solar energy through the launch of Kosovo's first ever ...

By increasing the share and capacity of solar energy in power generation, the project will contribute to energy supply security, a faster green transition and economic growth in the region. Upon completion, the plant is ...

Faton Citaku, Renewable Energy Engineer, working with local Solar Factory Jaha, tells us about the importance of this endeavor: "Approximately 97% of Kosovo's electricity needs are provided by two power plants: Kosova A and Kosova B which use coal as fuel. Although recently there have been made major investments on filters to reduce the ...

Kosovo's recent Energy Strategy sets an ambitious vision to achieving a just energy transition for the country between 2022-2031. The main pillar of the Strategy is to accelerate renewable ...

Solariss LLC is a renewable energy generation development company operating in Kosovo, fully owned by New Green Energy AG based in Switzerland. Solariss objective is to develop, construct, and ...

Tetra Tech is leading the five-year USAID Energy Sustainability Activity (ESA) to support Kosovo on its path to achieving a secure and sustainable energy future. The activity aims to improve Kosovo's energy security by strengthening the capacity and sustainability of local institutions to advance energy market development and regional ...

Kosovo must therefore increase its energy imports in order to provide basic services, but the country cannot afford the soaring energy prices. The significant drop in the price of solar power systems means that renewable energy now plays a crucial role in the energy transition and in ensuring a stable power supply.

Kosovo has previously offered feed-in tariffs for a quota of renewable energy projects, which has been fulfilled. Kosovo launched its first solar auction in May 2023, which will provide prospective bidders a guaranteed purchase price for 100 MW of solar energy.

By increasing the share and capacity of solar energy in power generation, the project will contribute to energy supply security, a faster green transition and economic growth in the region. Upon completion, the plant is expected to produce around 169 GWh of electricity and displace 174 000 tonnes of CO2 a year on average.

Currently, the heating sector (in residential, commercial, and public buildings) in Kosovo is supplied by individual heating solutions including biomass boilers at 48 %, and electric boilers at 33 %, with an increasing

trend in air-to-air compression heat pumps (Kosovo Agency of Statistics, n.d.-a; Kosovo Energy regulatory office, n.d.).

A beacon of innovation, the success stories of Kosovar companies illuminate the landscape with clean energy solutions. As Kosovo charts its course towards renewable energy, the impact on...

Tetra Tech is leading the five-year USAID Energy Sustainability Activity (ESA) to support Kosovo on its path to achieving a secure and sustainable energy future. The activity aims to improve Kosovo's energy security by strengthening the ...

Unlocking Renewable Energy Generation Opportunities between Victoria and Tasmania. Projects; Scaling Up Renewable Energy Worldwide. ... Explore our energy solutions. Our world-class engineers and scientists leverage industry-leading technical expertise, in-depth local knowledge, and sustainable approaches to provide resilient solutions for our ...

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. ... Kosovo: Energy intensity: how much energy does it use ...

Increased energy efficiency (EE) and renewable energy (RE) are fundamental components of the World Bank Group's energy sector engagement, and are key to helping Kosovo achieve greater energy security. The country has significant ...

To support the green transition in Kosovo*, the European Investment Bank (EIB) has signed a EUR33 million investment loan for the construction one of its largest solar photovoltaic plants near Pristina - with a capacity of up to 100 MWac (120MWp). By increasing the share and capacity of solar energy in power generation, the project will contribute to energy supply ...
