

Who is renewvia solar?

We design, install, own and operate commercial and community solar power systems across multiple continents, and provide a complete range of solar energy solutions including turnkey solar installation, integrated financing and solar consulting services. Renewvia launched in 2009 and developed our first rooftop array that same year.

Where will a solar plant be built in Kosovo?

The solar plant is planned to be built in southwestern Kosovo and to come online next year. The CEO of KOSTT, Mustafa Hasani, left, and the director of Solar Energy Group Europe, Egbert Schnuse. Image: KOSTT

Will a 150-megawatt solar farm be built in Kosovo?

PRISTINA, May 19 (Reuters) - A group of international and local investors have started to build a 150-megawatt (MW) solar farm in western part of Kosovo as the Balkan country is trying to phase out its dependence from coal. The Solar Energy Group Europe (SEGE) consortium plans to start production within 12 months.

How much solar power does Kosovo have?

Kosovo had just 7 MW of installed PV capacity at the end of 2019, according to the International Renewable Energy Agency. The country recently raised its renewable energy target to an additional 400 MW of capacity by 2026. That would be enough to meet a quarter of its power demand and would reduce dependence on aging coal-fired power plants.

Will Kosovo's first large scale solar park be built?

No further details were revealed on the project. When built, the plant will be Kosovo's first large scale solar park. The Kosovar government has made several attempts to support small sized and utility scale solar in the past. These efforts, however, have produced little results to date.

Where does Kosovo get its electricity?

Most of Kosovo's electricity is supplied as imports or from two lignite-fired thermal power plants, the 40-year-old Kosovo A Power Station (with a 345 MW generation capacity) near Pristina, and the upgraded, 27-year-old Kosovo B Power Station (540 MW) in Obilic.
