

What is renusol vs+?

The Renusol VS+ is a modular design system: Connection to the roof by means of roof hooks, hanger bolts, standing seam clamps. Mounting rails in different colours, sizes and lengths. Universal clamps provide for a robust locked fastening of the PV modules. You will find other products in our catalogue Or just select in the Online PV Configurator

What type of roof is renusol vs+ suitable for?

Renusol VS+ is suitable for nearly all types of pitched roofs in Europe. The reasonable choice of roof hooks allows the installation in the roof with the most diverse roof covering materials and substructures. Two mounting rails for medium and high load. Module clamps adjustable for different frame heights.

Who is renusol?

For almost a quarter of century Renusol has been available for you as competent contact partner for PV mounting systems. In the course of this, for the implementation of your PV projects, we are always offering you solutions that are far easier in the application than those of our competitors.

Why should you choose renusol?

Furthermore, we accomplished to combine the middle and end clamp for PV mounting systems in only one product - certainly patented and unique at the market. With Renusol, you have to hold in stock clearly fewer working appliances than with a comparable system. This saves space, money and time that you can reserve for more important things.

Renusol's VS+ mounting system is one of the manufacturer's most popular ranges, comprising all the solutions installers need to complete a safe, secure PV installation that attends to all key concerns of pitched roofing -- how to ...

A total of more than one gigawatt of photovoltaic capacity has already been installed, including more than 500 megawatts in Chile alone. Strong economic growth in many Latin American countries has spurred the demand for electricity and with it, electricity prices.

Roof slope min. 5°/max. 70°; (please check the admissibility with the Renusol Configurator)
