3 ???&#0183; The company handed over the first site of the second phase in April. According to Suriname's government, PowerChina is responsible for solar energy supply to 20% of the country's villages. While Suriname's national electricity access rate exceeds 98%, it drops to under 90% in rural areas.

We are not only suppliers but solar energy experts for all situations. We continuously strive to find and test new technologies, suiting local conditions with the best combination of product effectiveness, sensitive allocation of resources with minimum or zero running costs.

By switching to solar, Suriname can significantly reduce its carbon footprint, contributing to global efforts to combat climate change. Energy Independence: Solar energy production is decentralized, allowing power generation at the point of consumption.
