

When Rimac first revolutionized electric vehicles by creating the world's fastest electric production car--the Nevera--we proved that electric mobility could redefine performance. That same pioneering spirit now drives our mission in ...

After finding success in the electric hypercar space, Rimac Technology is now launching the Rimac Energy division to create next-generation stationary Energy Storage Systems (ESS). The performance electric vehicle brand's Energy ESS is developed using a unique electrical architecture that allows for 50% reduced energy losses and up to 40% ...

The new business unit, called Rimac Energy, will leverage the company's EV expertise for stationary energy-storage systems, starting with pilots with select customers, according to a company...

When Rimac first revolutionized electric vehicles by creating the world's fastest electric production car--the Nevera--we proved that electric mobility could redefine performance. That same pioneering spirit now drives our mission in energy storage, transforming sustainable power solutions with the same innovative approach that redefined ...

After finding success in the electric hypercar space, Rimac Technology is now launching the Rimac Energy division to create next-generation stationary Energy Storage Systems (ESS). The performance electric vehicle brand's Energy ...

With its Rimac Energy division focused on stationary energy storage systems, Rimac Technology is dedicated to advancing electric mobility and sustainable energy solutions. Ownership. 100%. Locations. 6. Employees . 1,100+ ...

Leveraging its group's expertise in EV technology, Rimac Energy has developed a novel battery architecture that is said to reduce efficiency losses by up to 50% while decreasing the system ...

The energy storage subsidiary of Croatia-headquartered electric vehicle (EV) company Rimac has officially launched its modular battery energy storage system (BESS) product. Rimac Energy last week (17 October) ...

Rimac Technology has announced the launch of a new brand called Rimac Energy, created to "accelerate the transition toward a sustainably powered planet." The new division says it will...

Our grid-scale energy storage solution is designed to support decarbonisation while improving the grid flexibility and resilience. The modular system can be scaled from 0,2 MW into the GWs ...

Rimac Technology has announced its entry into the stationary energy storage systems (ESS) market with a new brand, Rimac Energy. This marks a major milestone for the company, as it expands beyond its market-leading EV technology and introduces innovative stationary energy storage systems.

After finding success in the electric hypercar space, Rimac Technology is now launching the Rimac Energy division to create next-generation stationary Energy Storage Systems (ESS). ...

The integrated power conversion system and liquid thermal management minimize energy losses, providing operational redundancy and optimizing battery use to extend lifetime. Smart Control: ...

Our grid-scale energy storage solution is designed to support decarbonisation while improving the grid flexibility and resilience. The modular system can be scaled from 0,2 MW into the GWs and enables a range of applications from renewable co-location to wholesale arbitrage, and grid services, such as frequency regulation.

With its Rimac Energy division focused on stationary energy storage systems, Rimac Technology is dedicated to advancing electric mobility and sustainable energy solutions. Ownership. 100%. Locations. 6. Employees . 1,100+ Production space* 45,000 m²;+ Explore rimac technology *Including warehouse.

The integrated power conversion system and liquid thermal management minimize energy losses, providing operational redundancy and optimizing battery use to extend lifetime. Smart Control: Our in-house software stack incorporates Active Health Control, which adjusts each module's power output to ensure maximum system lifetime without ...
