

Why should we invest in Romanian solar?

Econergy identified Romania as an important European renewables player at the end of the 2010s and has become a leading developer and investor in Romanian PV. We have learned where Romania's bold commitments create opportunity, where growth is delayed, and how Romania is weathering current international challenges. Solar regulation

How many solar projects are there in Romania?

As of the latest data available, there are over 880 large-scale PV projects in Romania, boasting a cumulative capacity of approximately 46,600 MW. This impressive number showcases the country's commitment to harnessing solar energy as a clean and sustainable source of power.

What is Econergy doing in Romania?

Econergy has 233 MW of projects under construction in the country and a pipeline of around 2 GW in development or ready to build. We are excited to continue building in Romania. About the author: Bogdan Asanache is Econergy's country manager for Romania.

The solar pipeline here refers to solar photovoltaic (PV). Utility figures are for BNEF's mid-scenario only. 1. National context. Romania has a diversified energy mix, with renewable ...
