

Lockheed Martin and the Romanian company Sinteza S.A. signed, on Wednesday, a letter of intent with a view to the construction of a GridStar Flow battery factory in Oradea, with zero carbon emissions and which allow obtaining sustainable and stable energy, according to a press release of the Romanian company, quoted by Agerpres.

Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of EUR 150 million (\$158 million). With the funding secured from the Modernization Fund, the Ministry of Energy launched the ...

Romania's Prime Batteries Technology, which is developing a factory to produce batteries for energy storage facilities near Bucharest, announced that it is very close to completing the...

A zero-carbon GridStar Flow battery factory using Lockheed Martin's innovative technology will be built in Oradea, Romania, BalkanEngineer has learned from thediplomat.ro. The project is the result of an agreement between the US giant and the Romanian company Sinteza, signed in the presence of Romania's Energy Minister Sebastian Burduja and ...

Romanian developer Monsson has installed a 24 MWh battery storage system as the first stage of a 216 MWh project. The storage unit forms part of Romania's first hybrid PV-wind-battery system...

The Monsson Group has recently inaugurated, in Constanta County, the largest electricity storage unit installed and produced in Romania, the battery system being made by Prime Batteries Technology. Storage capacity ...

Lockheed Martin and the Romanian company Sinteza signed, on Wednesday, a letter of intent with a view to the construction of a GridStar Flow battery factory in Oradea, with zero carbon emissions and which allow obtaining sustainable and stable energy.

This collaboration will lead to the construction of a EUR 50 million long-term energy storage battery factory in Oradea, Bihor County, making it the largest of its kind globally and the first in Europe.

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via the National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in northwest of the country has flipped the switch.

The Monsson Group has recently inaugurated, in Constanta County, the largest electricity storage unit installed and produced in Romania, the battery system being made by Prime Batteries Technology. Storage

capacity will help reduce the volatility of renewable energy production and thus contribute to the stability of the energy system.

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via the National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in northwest of the ...

As the Romanian Ministry of Energy takes steps to encourage investments in standalone battery energy storage systems (BESS) through support schemes and an improved tariff regime, one regulatory challenge seems to have caught both investors and local authorities off-guard: a zonal urban plan (PUZ) is still necessary for developing standalone ...
