Romania and EIT InnoEnergy will work together to develop and implement a national battery strategy, perfectly aligned to the needs and opportunities of the European value chain. It will establish and activate the Romanian battery ecosystem, promoting its accelerated development.

Romania and EIT InnoEnergy will work together to develop and implement a national battery strategy, perfectly aligned to the needs and opportunities of the European value chain. It will establish and activate the Romanian battery ...

Romanian utility Societatea Energetica Electrica SA, or Electrica, has secured roughly EUR 3.4 million (USD 3.8m) in European funds to support the installation of a 69.9 MWh of battery storage capacity in the Transylvania region of its home country.

Prime Batteries, a company supported by InnoEnergy, and Monsson have put into operation the largest electricity storage capacity in Romania. This is part of the first hybrid photovoltaic-wind-battery project within ...

Prime Batteries, a company supported by InnoEnergy, and Monsson have put into operation the largest electricity storage capacity in Romania. This is part of the first hybrid photovoltaic-wind-battery project within the Mireasa Wind Park in Romania.

Romania aims to have at least 2.5 GW of battery energy storage systems (BESS) in operation by next year and to surpass 5 GW of capacity by 2026 under a plan that is seen to help it cope with high energy prices.

Romanian developer Monsson has installed a 24 MWh battery storage system as the first stage of a 216 MWh project. The storage unit forms part of Romania's first hybrid PV-wind-battery system.
