

What is Lina energy?

LiNa Energy is helping the energy sector accelerate the transition to Net Zero, through our safer and more sustainable alternative to lithium ion. We are leading the charge to develop and commercialise low-cost solid state sodium batteries, with a focus on the renewable energy storage market.

What is a Lina battery?

Whilst conventional batteries use a liquid electrolyte, LiNa's solid state ceramic electrolyte reduces ionic resistance and removes unproductive mass: unlocking a two-fold performance improvement in energy densities versus alternatives.

Can Lina automate a battery production process?

Through simultaneous engineering, the team has finalized a concept design, allowing LiNa, a leader in low cost solid-state sodium battery technologies, to automate their battery production process. The companies intend to validate the sustainable, safe, and efficient oxygen-free dry box environment as a step towards larger-scale manufacturing.

How do Lina batteries work?

LiNa batteries are constructed without lithium or cobalt. On charge, sodium ions from the sodium-metal-chloride cathode are reduced to sodium metal and travel through the solid-state ceramic electrolyte to the anode compartment, forming an interconnected backbone conductor.

How does Lina energy storage work?

On discharge, the sodium is oxidised back to sodium ions and travels through the conductive backbone, recrystallising in the cathode. LiNa's energy storage systems take a radical approach to thermal management, providing customers with low-cost and high performance energy storage even in high ambient temperatures.

Who are Lina energy & NIG Metall?

LiNa Energy and NIG METALL Group announce today that they have signed a Memorandum of Understanding (MoU) to advance the commercialisation of next-generation solid state sodium batteries.

Belgian company Avesta Battery and Energy Engineering (ABEE) is building a battery cell factory in Romania that will mainly supply cells for the automotive industry. ABEE is investing 1.4 billion euros in the cell factory called Romvolt, which will be located in Galati in eastern Romania.

Belgian company Avesta Battery and Energy Engineering (ABEE) has decided to end its collaboration for the project in Romania but continues to explore other promising locations to support strategic ...

Comau, a manufacturing solutions company owned by Stellantis, has partnered with LiNa, a

sodium-metal-chloride battery maker, to design a scalable manufacturing solution for their cells. The companies aim to validate an oxygen-free dry box environment for safe, efficient, and sustainable large-scale manufacturing. The companies' teams collaborated to design the ...

iulian@romania-insider . Read next. 16 October 2024. Capital markets powered by BSE. Romanian hydropower group Hidroelectrica unveils EUR 280 mln investment plans at first investors meeting.

From a product development point of view, LiNa further improved the performance of their solid-state battery cells, and designed and constructed a modular system for use in their beachhead market, static-energy storage.

Comau, a manufacturing solutions company owned by Stellantis, has partnered with LiNa, a sodium-metal-chloride battery maker, to design a scalable manufacturing solution for their cells. The companies aim to validate an ...

Romania . Polonia Germania Franta Italia Spania Republica Ceh ... c&#226;t si planeta noastra. &#206;n Battery Empire, veti gasi, de asemenea, baterii pentru laptopuri si alte dispozitive precum camere, aspiratoare, drone sau difuzoare. De asemenea, suntem constienti de faptul ca bateriile de unica folosinta reprezinta o problema de montare.

The Romanian battery producer, that's the leader on the Romanian market, launches the capability to deliver top batteries for future's cars. ... + See more. ROMBAT AT MADRID AND PARIS 11.03.2015 The biggest Romanian car batteries manufacturer, ROMBAT SA, will attend in the near future at three of the most prestigious auto shows in the world

Romania hopes for at least 2 GW a year of battery production and recycling The aim is to bring online at least 2 GW of battery production, recycling, or assembly a year by mid-2026. That could include any combination of electrode or electrode component production including recycling, and assembly of electrodes in batteries and testing and ...

Romanian lithium-ion batteries producer Prime Batteries Technology (PBT), set up in 2016 by two local entrepreneurs, joined forces with the EIT InnoEnergy conglomerate co-founded by the European ...

LiNa Energy has been selected as one of the few companies participating in the Battery Technology GBIP Japan by Innovate UK. With a full agenda planned and valuable networking meetings scheduled, LiNa's CCO ...

A questo proposito la societ&#224; britannica LiNa sta mettendo in commercio una nuova batteria al sodio in stato solido senza cobalto e litio e costruita con materiali di facile ...

Automation technology company Comau and solid-state sodium battery developer LiNa Energy have jointly developed a concept for automating the production of solid-state sodium metal chloride battery cells. The

project aims at automating LiNa Energy's battery production. As a step towards larger-scale production, the companies want to validate ...

Medical Value Partner &#183; Experienced medicine information professional with more than 16 years of experience in Medicine Information, Pharmacovigilance and Medical Affairs .& lt;br& gt;Multi-skilled and flexible professional with an ability to coordinate and communicate effectively with diverse industry professionals and regulatory bodies. & lt;br& gt;Outgoing personality with ...

Toate statiunile de la Marea Neagra din Romania, de la sud la nord. ... Ambele dispun de o intrare lina in apa. Asa cum spuneam mai sus, in Mangalia puteti avea parte de mai multe activitati si locuri de vizitat, si anume: ...

We see a joint opportunity to disrupt the stationary storage market with a battery designed for high-scale manufacturing, breaking free from constrained lithium-ion supply chains and benefiting from proven industrial ...
