

What is the best type of solar panel financing?

For many people, the best type of solar panel financing is probably a personal loan for solar. A personal solar panel loan will come with fixed interest rates and fixed monthly payments that never change during the life of the loan. Some home improvement loans have higher limits or longer terms to make it easier to pay for more expensive options.

Where can I get a solar loan?

Many different institutions offer solar loans, including local and national banks, specialty financing companies, manufacturers, and credit unions. To choose the best solar loan for you, compare options from a few different financing providers. Use the EnergySage Solar Marketplace to review multiple equipment, installer, and financing options.

How do I choose a solar panel loan?

Follow these tips when comparing solar panel loans: Consider solar panel specialty loans. Look for solar-specific loan products, such as financing offered by the solar panel manufacturer or installer. Take time to find the best option. Shop around to find the best deal. Be sure to consider interest rates, terms and fees. Review your terms.

How do I get solar panel financing?

Depending on your location and the panels you're buying, there may be several ways to get solar panel financing. Start by asking the solar panel manufacturer and installer whether it offers in-house financing. This can be a good option if you don't have good credit or want a streamlined loan process. Ask around for referrals.

What is a solar panel loan?

Solar panel loans are similar to home improvement loans, which are used to pay for projects like remodeling your kitchen, upgrading an HVAC system, or adding a new bathroom.

Are home equity loans a good choice for solar panels?

Home equity loans and HELOCs are a good choice for solar panel financing if you have sufficient equity in your home and have determined that solar panels are likely to add value to it. This kind of equity-backed loan for solar is also worth considering if you don't qualify for a personal loan with a good rate because of your credit.

You can take out a long-term loan to pay off the cost of your solar installation over many years, but there are also short-term (12-18 months) loans, also called bridge loans, that allow you to use the ITC and state credits
