Paraguay has one of the highest proportions of renewable energy in South America. Hydropower constitutes around 99.5% of the installed electricity capacity. This makes it highly dependent on the rivers that feed the country's main hydroelectric plants, from where most of the electricity produced is exported to neighboring countries.

Unlike fossil fuel-based energy sources, which are subject to the volatility of international oil and gas prices, solar energy has predictable costs once the initial investment is made. This would allow Paraguay to maintain competitive energy rates, improve its energy security, and reduce its exposure to global market fluctuations, ensuring ...
