

What is the Hanel rotomat storage carousel?

The Hanel Rotomat storage carousel makes use of the available room height and creates up to 60 % more storage capacity thanks to its compact design. This means costly warehousing space can be used more efficiently. Work time slashed The Hanel Rotomat storage carousel brings the required parts to the retrieval area in just a few seconds.

What is a Hanel rotomat storage system?

The Hanel Rotomat storage system is a dynamic solution that uses vertically rotating shelves to bring stored items to the system operator. Vertical Carousel Modules are a series of carriers attached in fixed locations to a chain drive.

What is automated storage and Retrieval System (AS/RS)?

This automated storage and retrieval system (AS/RS) consists of rotating vertical carousels with shelves or trays for storing items. How it works: These carousels rotate horizontally to bring the desired item to the access point, improving storage efficiency and retrieval speed.

Can rotomat be integrated with an ERP or WMS system?

An individual Rotomat or network of Rotomats can quite easily be integrated with a higher-level host ERP or WMS system. The web service-based technology enables a link between the host, (SAP for example) and the machine's controller without the need for middleware. Users can request items or specific shelves directly from the Controller.
