

What does Hanwha energy do?

Since its start in the cogeneration business in 2007, Hanwha Energy has diversified its business portfolio -- including solar power, energy storage systems (ESS), and LNG -- to evolve into a retail energy business that offers a comprehensive set of energy solutions.

Why should you choose Hanwha energy?

Through our diversified efforts, we will continue to grow as a leader in the sustainable, eco-friendly energy market. Hanwha Energy is a comprehensive energy solutions company whose offerings include LNG, energy storage systems (ESS), renewable energy and cogeneration.

What is Hanwha's clean hydrogen value chain?

Hanwha's clean hydrogen value chain will use renewable energy and ammonia, encompassing not only clean hydrogen production but also storage, transport, and utilization through seven of its affiliates. Such developments will help to scale the hydrogen economy and make hydrogen more available and affordable.

What is a Hanwha Arc7 LNG carrier?

Hanwha Ocean constructs specialized icebreaking LNG carriers originally intended for the Russian Arctic LNG 2 project. (Photo: Hanwha Ocean) The Arc7 LNG carriers are special icebreaking vessels that were supposed to be deployed in the Russian Arctic.

How is Hanwha laying the groundwork?

Through insights from trailblazers at Hanwha Qcells, Hanwha Ocean, Hanwha Power Systems, and PSM, discover how Hanwha is laying the groundwork by delivering transformative decarbonization solutions in a dynamic energy landscape.

Is Hanwha still owned by New Transshipment?

Correction 27.02.2024: As we learned today, the transfer of registered ownership was reversed shortly before we published the report, also in view of the new US sanctions imposed last week. The ship is once again owned by Hanwha and no longer by New Transshipment.

The facility, located on the Gydan peninsula above the Arctic Circle, is crucial for Russia's goal to more than triple its LNG production to 100 million tons by the end of the decade, Bloomberg said, noting that the U.S. sanctions imposed on the project's operator in November 2023 put that goal at risk.

Russian natural gas company Novatek takes a key step toward beginning shipments from its Arctic LNG 2 project. Ship registry records suggest that ownership of the ice-capable Arc7 LNG carrier...

U.S. sanctions pose a major obstacle to Russia's plans to increase exports of seaborne liquefied natural gas

(LNG) to offset the decline in pipeline gas exports to Europe, analysts said, as ...

Russia is hoping its shipments of liquefied natural gas (LNG) will offset a sharp fall in pipeline gas exports to Europe, but a shortage of gas tankers and sanctions hold back its plans, analysts and industry sources said.

The plant on the Gydan Peninsula is Novatek's second major project and is considered crucial to Russia's goal of more than tripling its LNG production to 100 million tons by the end of the decade.

Through insights from trailblazers at Hanwha Qcells, Hanwha Ocean, Hanwha Power Systems, and PSM, discover how Hanwha is laying the groundwork by delivering transformative decarbonization solutions in a dynamic energy landscape.

The three former Sovcomflot newbuildings -- the as-yet-undelivered Pyotr Kapitsa, Lev Landau and Zhores Alferov -- are now under Hanwha Ocean's ownership and have been sanctioned by the US.
