

From 45kW to 360kW net power, Ballard's heavy-duty fuel cell modules offer flexible and reliable solutions for your transportation and power generation needs. Powered by Ballard's unique PEM fuel cell stacks, our modules are designed to meet the mechanical, electrical and environmental requirements of the most demanding applications.

Ballard Power Systems Inc. is a developer and manufacturer of proton exchange membrane (PEM) fuel cell products for markets such as heavy-duty motive (consisting of bus and tram applications), portable power, material handling as well as engineering services. Ballard has designed and shipped over 400 MW of fuel cell products to date.

Ballard is recognized as a world leader in proton exchange membrane ("PEM") fuel cell development and commercialization. The company's business strategy is a two-pronged approach to build shareholder value through the sale and service of Power Products and the delivery of Technology Solutions.
