

Looking ahead to 2024, Rwanda's solar energy roadmap envisions a substantial increase in installed solar capacity. The country aims to generate a significant percentage of its total electricity from solar sources, further reducing its carbon footprint.

A Solar Home System (SHS) is a small-scale, autonomous electricity supply for households that are off-grid or have unreliable access to energy. It generates electricity from sunshine and stores the electricity in a battery for consumption during the night or cloudy days.
