

What does Centrica Energy Storage do?

A key element of the infrastructure area of the Centrica family, Centrica Energy Storage operates the Easington onshore gas processing terminal in East Yorkshire and restarted gas storage operations at the Rough facility in the Southern North Sea in 2022, with a view to bolstering the UK's energy security and helping to reduce consumer bills.

What is Centrica Storage Limited?

The long term aim for Centrica Storage Limited is to turn Rough into the largest long duration energy storage facility in Europe, capable of storing both natural gas and hydrogen with the goal of bolstering the UK's energy security. Formerly Centrica Storage Limited (CSL), we have recently changed our name to signify a change in ambition.

Who are Centrica Energy Storage Limited (CES+)?

Centrica Energy Storage Limited (CES+) are part of the infrastructure area of the Centrica family.

What makes Centrica unique?

Centrica is unique among energy companies in the UK and Ireland, in its operating across the entire energy value chain through a variety of distinct, but complimentary businesses, all of which have a common purpose, the organisation says: "helping you live sustainably, simply, and affordably."

Image: Centrica. Centrica Business Solutions has acquired a 30MW fully consented battery energy storage project in Scotland, UK, which will help manage North Sea offshore wind farms. The two-hour duration (60MWh) battery storage plant in Dyce, near Aberdeen, was developed by Cragside Energy Limited and backed by Omni Partners LLP.

Centrica and FTI report finds that hydrogen storage would help balance the UK's energy system and reduce bills. A net zero scenario including large scale hydrogen storage - specifically, a redeveloped Rough gas storage facility - would reduce energy costs by an additional £1bn per year by 2050.

Chris O'Shea, Centrica Group Chief Executive said: "At a time when energy security is uppermost in people's mind, I'm delighted that we're able to extend the operating window of the UK's nuclear fleet, which is critical to UK security of supply and the country's net zero ambitions. In an energy system that is becoming ever more ...

We operate the Rough gas storage facility in the Southern North Sea and the Easington onshore gas processing terminal in East Yorkshire, having restarted storage operations at Rough in 2022 to bolster the UK's energy security and help reduce consumer bills.

Centrica's long-term ambition is to turn the Rough gas field into the largest long duration low carbon energy storage facility in the world, capable of storing both natural gas and hydrogen. Centrica Group Chief Executive, Chris O'Shea, said "The resilience of the UK's energy system needs to be substantially improved.

In line with our strategy to decarbonise the portfolio and reduce our exposure to oil and gas production, we have committed not to explore for new hydrocarbon reserves, instead focusing on ensuring we can fund our decommissioning liabilities while pursuing opportunities to leverage existing infrastructure to promote energy security and help the UK ...

A roundup of battery storage news in the UK, with projects from Centrica, Pulse Clean Energy, Habitat Energy and Gore Street, as the country's operational capacity reaches over 3GW. The flurry of project news, alongside reports of a big fundraise by developer Field, comes as the UK's operational capacity hits over 3GW/3.4GWh and another 2 ...
