While EVs offer consumers lower maintenance and fuel cost, in the long run, the initial outlay of cash needed to purchase such vehicles is significantly higher than vehicles powered by fossil fuels. This is mainly due to the high production cost of ...

Saint Lucia's energy transition opportunity provides a win-win situation in which the Government of Saint Lucia supports constituents through cheaper electricity, and LUCELEC continues to profit and provide reliable service. The analytical team supporting the IRP initially examined 14 scenarios for the future energy mix of Saint Lucia,

Expect to pay a minimum to \$10,000 (item cost, shipping, duties, labour) to replace battery on a smaller hybrid (Toyota Aqua, Honda Fit and similar). Far more for an electric car. And of course if you got to a roadside mechanic to try to save on cost, expect a disaster.

The table below contains a summary of the levelised cost of energy (LCOE) from various renewable energy sources applicable to Saint Lucia (Latin America and the Caribbean region) according to the International

Renewable Energy Association (IRENA):

The IRA includes a clause that automatically qualifies EV battery materials recycled in the U.S. as American-made for subsidies, regardless of their origin. That is important because it qualifies automakers using U.S.-recycled battery materials for ...

This document presents St. Lucia's Energy Report Card (ERC) for 2020. The ERC provides an overview of the energy sector performance in St. Lucia. The ERC also includes energy efficiency, technical assistance, workforce, training, and capacity building information, subject to the availability of data.
