

What is the future of electricity in Saint Lucia?

At the same time, recent developments in energy efficiency, renewable energy, cleaner-burning fuels (e.g., natural gas), electricity storage, and advanced controls and metering present a myriad of opportunities. Saint Lucia's current electricity system is well managed, reliable, and equitable.

Is Saint Lucia reliant on fossil fuels for electricity generation?

Like many island nations, Saint Lucia is almost 100% reliant on imported fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity. Electricity Sector Data

How much electricity does Saint Lucia have?

LUCELEC has an installed electricity generating capacity of 78.4 megawatts (MW), with peak demand of 60 MW. Most of the island's energy is produced from imported diesel fuel that powers electrical generators. Saint Lucia's electricity rates are more than triple the U.S. average.

What is Saint Lucia's energy transition opportunity?

RESULTS Saint Lucia's energy transition opportunity provides a win-win situation in which the Government of Saint Lucia supports constituents through cheaper electricity, and LUCELEC continues to profit and provide reliable service.

Who is Hofman energy?

We wish everyone a Merry Christmas and relaxing holidays and welcome you again from January 8, 2024. Hofman Energy, together with its partners, has been active in the field of renewable energy for several years, with a personal interest in the implementation of the energy transition.

How much geothermal potential does Saint Lucia have?

The volcano that sits in the middle of Saint Lucia provides vast geothermal potential. Conservative estimates indicate more than 30 MW of technical geothermal potential; others estimate 170 MW. Estimates also show that development of this geothermal resource would likely be economically feasible.

Hofman Energy ist zusammen mit seinen Partnern seit mehreren Jahren im Bereich der erneuerbaren Energien aktiv, mit einem persönlichen Interesse an der Umsetzung der Energiewende. Wir sind Experten in allen Bereichen der regenerativen Energie, egal wie groß; oder klein Ihr Projekt ist.

Saint Lucia's energy landscape presents a clear picture of fossil fuel dependence, with the island consuming over 20.7 million imperial gallons of diesel for electricity generation alone in 2022. The island nation's electricity system, operated by Saint Lucia Electricity Services Limited (LUCELEC), maintains an installed generating capacity ...

The project's unique design reflects Saint Lucia's ambition to transform its energy sector for a long-lasting positive impact on its people. The project is using public finance for geothermal exploration, and will foster ...

High-voltage premium LiFePO4 energy storage from HOFMAN-ENERGY. Modern design and very easy installation. Compact and lightweight, installation by a single person, plug & play, no cabling required between the individual battery modules.

High-voltage premium LiFePO4 energy storage from HOFMAN-ENERGY. Modern design and very easy installation. Compact and lightweight, installation by a single person, plug & play, no cabling required between the individual ...

We are experts in all areas of renewable energy, no matter how big or small your project is. We will accompany you from the beginning and will not abandon you after the project implementation, but will continue to support you!
