SOLARsk is the largest manufacturer of mounting systems in Eastern Europe. The company is also engaged in the design, construction, and maintenance of private and industrial solar power plants

With extensive expertise in metal processing and galvanising, Solar Steelconstruction operates three production facilities in Ukraine with the capacity to manufacture over 1 gigawatt of mounting systems annually.

During its operation, Solar Steelconstruction has already implemented a number of large-scale projects in the solar energy sector and participated in the construction of many facilities with a total generation capacity of over 3000 MW.

The goals for 2021 are more ambitious. The main task is to become even stronger than we are and more resistant to external challenges, says Yevhen Kornilov, deputy director of business development at Solar Steelconstruction LLC.
