

What is Kosovo's solar energy project?

The project is the largest solar energy investment in the district heating sector in the region and one of the largest solar power plants in Europe. As such, the project marks an historic moment on Kosovo's path towards a decarbonised energy system in line with the Paris Climate Agreement.

How much will Germany contribute to Kosovo's solar energy project?

The EU's contribution to solar heating and electricity projects in Kosovo will total almost EUR56 million. "Germany has supported Kosovo in its transition from coal to sustainable energy and decarbonisation in accordance with the objectives of the Green Agenda for the Western Balkans," said Germany's Deputy Ambassador to Kosovo Matthias Conrad.

Will Kosovo become the first economy to use solar power?

Kosovo will become the first economy in the Western Balkans region to use solar power to heat homes. The Ministry of Finance, Labour and Transfers signed a financing agreement on the Solar4Kosovo district heating project on behalf of Kosovo in Pristina today.

Will Kosovo use solar energy for district heating?

In late December 2022, Kosovo became the first country in the Western Balkans Economy to use solar energy for district heating. Kosovo's Minister of Finance, Labour and Transfers, Hekuran Murati, said the project would ensure access to the central heating system for about 38,000 citizens.

How will the EU support the energy transition in Kosovo?

The EU will support the energy transition and sustainable development of Kosovo through another 100-megawatt solar electricity project with the Kosovo Energy Cooperation." The EU's contribution to solar heating and electricity projects in Kosovo will total almost EUR56 million.

Could Sardinia occupy a unique position in the Mediterranean?

Such is Sardinia's natural beauty that its "Costa Smeralda" or "Emerald Coast" is famous the world over, but perhaps green is a more appropriate colour for describing the island's future, as it leads the way in the energy transition. According to Enel CEO Francesco Starace, Sardinia could occupy a unique position in the Mediterranean.

From the point of view of solar radiation, the Sardinia region represents one of the regions with the areas with the highest energy efficiency coefficient for solar plants (1,400-1,500 KW/KWp). In 2021, the Group obtained authorization for the first project for an installed capacity of 45 MWp.

To support the green transition in Kosovo*, the European Investment Bank (EIB) has signed a EUR33 million investment loan for the construction one of its largest solar photovoltaic plants near Pristina - with a capacity

of up to 100 MWac (120MWp).

This investment project will install a solar photovoltaic plant of up to 100 MW capacity on former ash dump fields near Kosovo A thermal power plant. This will be the first large-scale solar photovoltaic plant in Kosovo and will increase installed capacities tenfold from 10.1 MW to ...

Based on an analysis of policy documents, and interviews with installation firms and developers, it is estimated that Kosovo* could install 250 MW of solar capacity for self-consumption by the end of 2030, and based on ...

The district heating project envisages the construction of a solar power plant that uses the sun's energy for central heating. It will also increase heating capacity by expanding the network by 50 MW. The innovative technology enables the collection of solar energy during the summer, its storage and use for central heating during the winter.

Once the Tyrrhenian Link is up and running (and it should be by 2030, if not before), an extra gigawatt of battery power and 4 to 5 gigawatts of renewable energy (with respect to what is...

To support the green transition in Kosovo*, the European Investment Bank (EIB) has signed a EUR33 million investment loan for the construction one of its largest solar photovoltaic plants near Pristina - with a ...

Based on an analysis of policy documents, and interviews with installation firms and developers, it is estimated that Kosovo* could install 250 MW of solar capacity for self-consumption by the end of 2030, and based on the prices of previously installed projects, that could translate into EUR 300 million in investment, Lorik Haxhiu said at the ...

Despite being geographically well suited for developing solar energy, Kosovo is facing legal, administrative, and financial barriers such as prolonged authorization procedures, solar PV installed capacity limitation, lack of RES skills and capacities, protracted legalization process, lack of public awareness, and modest support schemes, that

Such is Sardinia's natural beauty that its "Costa Smeralda" or "Emerald Coast" is famous the world over, but perhaps green is a more appropriate color for describing the island's future, as it leads the way in the energy transition. According to Enel CEO Francesco Starace, Sardinia could occupy a unique position in the Mediterranean.

Kosovo has announced the winner of its first solar power tender, with a consortium led by Swiss construction group Orllati securing a 100-MW project with a bid of EUR 48.88 per MWh. The competition attracted six bidders, but only five participated in the e-auction, including companies from Turkey, France, and Egypt.

The district heating project envisages the construction of a solar power plant that uses the sun's energy for

central heating. It will also increase heating capacity by expending the network by 50 MW. The ...
