

Scam of exporting photovoltaic panels exposed

Are solar panel Scams A Perfect Storm?

Fueled by a drop in solar panel costs, an urge to fight climate change, the availability of real but sometimes confusing government incentives and a desire to save on rising energy bills, solar panel scams are hitting consumers across the United States. "I think it's a perfect storm," says Minnesota Assistant Attorney General Noah Lewellen.

Will a retroactive tax on solar panels hurt the solar industry?

Retroactive taxes on solar panels from China are likely to dramatically increase costs for U.S. solar installers. If the government decides to impose these taxes on the country's primary sources of solar panels, the resulting stress on the supply chain could put a damper on the solar industry's expansion.

Are customer complaints a problem in the solar industry?

Customer complaints against the country's residential rooftop solar industry have increased dramatically in recent years. One-star ratings on Solar Reviews increased more than 1,000% since 2018. Across the country, prosecutors are investigating high-pressure sales tactics and misleading financing arrangements.

Does rooftop solar have a fraud problem?

Rooftop solar has a fraud problem. The industry is working to build back trust A crew installs a solar array on the roof of a home in Frankfort, Ky., in 2023. PHILADELPHIA -- The solar power industry is booming and that growth helps the world meet its climate goals by replacing fossil fuels.

Why are prosecutors investigating rooftop solar?

Across the country, prosecutors are investigating high-pressure sales tactics and misleading financing arrangements. Some customers say they were victims of fraud and forgery. This threatens rooftop solar's impressive momentum. Now, some solar companies are working to repair the industry's reputation.

What should I do if a solar business is a scam?

Protect your personal information. Don't respond to unexpected requests online or on social media for your name, address, or other personal information to "see if you qualify." At best, this is someone generating leads to sell, not actual solar businesses. At worst, they're scammers trying to steal your identity.

It's likely a scam. While there are some government-funded solar programs for households that qualify, "going solar" isn't free. Honest businesses will tell you exactly how much it'll cost to get and install solar ...

These scams start with an unexpected phone call, message on social, or even an in-person visit. The so-called official offers you an "energy audit" to reduce your utility costs. Or they might try to sign you up for a "free" program to make your ...

Scam of exporting photovoltaic panels exposed
