

How does Costa Rica generate electricity?

Since 2014, Costa Rica has been generating more than 98% of its electricity from renewable sources, but has yet to turn fully to renewables in other sectors such as transportation. In 2020, renewables accounted for more than 99% of the country's electrical generation, with hydro, wind, and geothermal being the three key sources.

Who owns Costa Rica's electricity?

Vertically integrated Grupo ICE is the dominant force in Costa Rica's electricity sector. With extensive operations in power generation, transmission and distribution, it supplies the nation with almost 78 percent of its electricity. The state-owned group is also the country's incumbent player and market leader in telecommunication services.

How renewable is Costa Rica's electricity?

Costa Rica's electrical generation has been nearly 100% renewable since 2014; preliminary figures from 2020 showed hydropower (72%), geothermal (14.9%) and wind energy (12%) continuing to lead the way.

Does Costa Rica have a green energy sector?

The green energy sector has created approximately 3,000 jobs in Costa Rica in areas such as biofuels, solar energy, and bus reconversion. As of 2020 Costa Rica's installed electrical capacity was 3537 MW, with renewables accounting for nearly 87% and fossil fuels making up the remainder.

What is RGY for Costa Rica?
