The Scottish Energy Advisory Board (SEAB) was established in 2009 to provide a forum for strategic discussion on the current and future energy challenges and opportunities for Scotland. The SEAB will develop the Scottish industry view on these issues, to include potential synergies between the oil and gas, thermal generation, carbon capture and ...

Across the globe, every 1,000 tons of waste processed results in 400 tons of carbon emissions. SEaB spent over £6M developing our founder's invention into the first and leading micro waste-to-energy plants built in shipping containers, that use anaerobic digestion to transform organic waste into biogas in a process that emits no greenhouse gases.

SEAB has signed a Head of Agreement (HOA) with the Iraqi Ministry of Oil to develop a 70,000 bpd refinery on a build, own & operate basis in the Nineveh Governorate. We're excited about the opportunity to bring economic benefits to the region while supplying the domestic market with refined products in line with the governments development ...
