

What is Seychelles' energy policy?

Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated. This 6 MW power plant can produce up to 2% of the Seychelles' power and is located on Mahé Island. It is expected that the wind farm will replace 1.6 million litres of diesel fuel annually.

How is electricity produced in Seychelles?

Electricity for the island nation of Seychelles is primarily produced by diesel generators which must import their fuel (69 MW on Mahe and 12 MW on Praslin). Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated.

Why is the PUC planning a power transition in Seychelles?

For the next four to five years, the PUC has carefully scheduled this transition in order to guarantee a stable energy supply that can sufficiently sustain the nation's economy. Seychelles currently has a total power generation capacity of 129MW, mostly produced by PUC, through its diesel power plants and solar farms.

Who funded the Seychelles wind farm project?

The wind farm project was fully funded by the Abu Dhabi government through a \$28 Million grant to the Seychelles. The Abu Dhabi government appointed Masdar as project manager.

In a statement via Bursa Malaysia yesterday, Linear said its wholly owned subsidiary LCI Global Sdn Bhd had accepted the project awarded by Republic of Seychelles-incorporated Global Investment Group Inc on Dec 24, 2009 to build and commission a 350,000 refrigeration tonne (RT) plant for the King Dome Project.

(Seychelles News Agency) - Seychelles' main power station, located at Roche Caiman on Mahe Island, is to be expanded by 18MW, the Public Utilities Corporation (PUC) announced recently. With the installation of two new 8MW generator sets, this will bring the total capacity to 92MW at that particular power station, with the Victoria Power ...

To meet the growing electricity demand and improve reliability on Mahé, the Public Utilities Corporation is expanding the generation capacity of its Roche Caiman power station. According to the Public Utilities Corporation (PUC), as of 2024, electricity demand on Mahé stands at 63.8 MW.
