

What is a sinkeu power station?

Portable Power Stations: SinKeu's range of portable power stations, such as the 600W model with a 296Wh lithium battery, offers a reliable power source for outdoor adventures and emergencies. These stations can power multiple devices simultaneously through diverse ports, including USB-C and carports.

How many volts can a sinkeu power station take?

The SinKeu power stations can accept a voltage input between 13V and 23V. We recommend using a solar panel with at least 40W of power. The charging time will depend on the sunlight intensity and the solar panel's power. For example, you can use a 40W foldable solar panel to recharge the power station when camping or during power outages.

Does the sinkeu power station support pass-through charging?

Yes, the SinKeu power station supports pass-through charging, allowing you to charge your devices while the power station itself is charging. However, for better battery maintenance, it's not recommended to charge devices that draw more than 50W while the power station is charging.
