

Skyfri is headquartered in Oslo, Norway, with offices in London and Denver. With a track record since 2018 our technology-first approach towards distributed renewable asset is transforming how fast growing portfolios of hybrid sites are managed. Our team has managed over 3 GW of assets across Europe, Asia and North America.

Skyfri is home to a team of solar asset managers, O& M managers, performance management experts, renewable energy investors and IPP executives. Our edge is global industry experience combined with digital solutions that enables superior value.

Skyfri offers a digital platform automating solar plant operations, maintenance, and asset management. Their goal is to make solar power the most accessible, smartest, and cleanest energy source. With their product, they transform the way the solar panels are operated globally.

Descarga escrituras del Registro P&#250;blico de Panam&#225;. Recibe alertas. Consulta directores, avisos de operaci&#243;n, marcas, importaciones, licitaciones y m&#225;s.

Our proprietary asset performance management system, Skyfri Intelligence, monitors site generation 24/7, detects and addresses site issues, underperformance, natural losses and equipment failure in real time. The integrated CMMS system then dynamically create incidents and sends priority tickets to site team and/or OEMs to reduce downtime.

Skyfri Group, a Norwegian fast-growing climate technology company that delivers a fully integrated technology platform to take care of solar power plants, grows into the US market. The company has established an office and assembly facility in Denver, Colorado.
