

Who is Sunstone power?

Sunstone Power is a manufacturer with 20 years of experience, focusing on backup power, manufacturing lead-acid batteries, LiFePO4 batteries and their BMS.

What is the potential of photovoltaic energy in Slovenia?

Slovenia offers great potential for exploiting photovoltaic energy due to evenly spread solar irradiation. The first photovoltaic power plant in Slovenia was set up in 2001. At the end of 2017, 4,231 photovoltaic power plants had been installed in Slovenia with a total power of 267 MW.

How much energy does Slovenia produce?

Slovenia generated 68.8% of its electricity with zero carbon or carbon neutral sources in 2019, dominated by nuclear power and hydroelectricity. Fossil fuels oil, coal, and natural gas contributed 61% of the total energy supply of Slovenia in 2019.

Does Slovenia have solar power?

Per analysis published by the World Bank which considers natural features of a location such as altitude, humidity, cloud cover, and topography, Slovenia's solar PV potential is relatively low compared to global resources, but is comparable to that of other central and eastern European countries which lie north of the Alps.

How many wind turbines are there in Slovenia?

A solar power plant with a capacity of 6MW opened in 2023 at Brezice, linked to the hydro power plant. Slovenia had just 2 wind turbines in 2022. Onshore wind energy potential for Slovenia is typical of central and eastern Europe.

The results show that using an optimal combination of conventional and new power production technologies, Slovenia can reach the goal of a carbon-free power system by 2037, when a new nuclear unit could enter

operation.

Hersteller von Batterien & Anbieter von PV-Lösungen. Sunstone Power hat eine über 20-jährige Geschichte als Hersteller, der sich auf Blei- und Lithiumbatterien spezialisiert hat. Wir haben umfangreiche Projekterfahrung in UPS Anlage und PV Anlage.

Designed and developed by Sunstone, the SLPO series is a LiFePO₄(lithium iron phosphate)battery pack for backup power. The battery pack adopts the advanced LiFePO₄ battery technology with the advantages of long cycle life, small size, lightweight, safety, and environmental protection, and also has strong environmental adaptability.

Onshore wind: Potential wind power density (W/m²) is shown in the seven classes used by NREL, measured at a height of 100m. The bar chart shows the distribution of the country's land area in each of these classes compared to the global distribution of wind resources. Areas in the third class or above are considered to be a good wind resource.
