

What is smartflower solar?

SmartFlower Solar produces unique, ground-mounted solar panel systems that include a sun tracker and a number of other high-tech features. This 'smart' solar panel system is an all-in-one, self-sustaining system that differs greatly from the traditional monocrystalline or polycrystalline rooftop panels.

Are smartflower solar panels a good choice?

If you care about design and ease of use more than cost-effectiveness, and also do not need to cover all of your energy needs with one system, then the SmartFlower solar panel system can be a good option for you. Alternatively, a rooftop or traditional ground-mounted solar panel system will be much more affordable and practical for most consumers.

How much does a smartflower Solar System cost?

If we consider the price per watt for new solar systems is generally in the \$3-\$4 range in 2023 according to national estimates, then a Smartflower system costs between three and four times as much as conventional rooftop solar. And that's with the 40% bump in energy production from Smartflower's dual-axis tracking already factored in.

How big is a smartflower solar panel system?

Rooftop solar panel systems may need to be customized to account for several variables like roof type and space availability, but with the ground-mounted SmartFlower module, you have the freedom to install the system wherever there is sufficient exposure to sunlight. The unit itself is 194 square feet.

What is a smartflower plus Solar System?

The Smartflower Plus is the same system with a solar-powered integrated battery and inverter that can be used to run either a hybrid system or a complete standalone off-grid solar system.

How much power does a smartflower Solar System produce?

Smartflower published an output expectancy map on their website showing the amount of power you can expect to get out of their 2.5 kW array. With 5,510 kWh per year in Los Angeles, the Solarflower rivals the output of a 4kW rooftop solar panel system.

SmartFlower is an all-in-one residential solar system that's easily installed by trained professionals (3-4 hours), offers a small footprint (approximately 5 feet square), cleans itself of ...

The Smartflower, or Solar Sunflower, is a blend between solar panels and art. It is a photovoltaic (PV) system that has been incorporated to bring visibility to solar technology, and at the same time to enhance the landscape and architecture they complement via aesthetics.

SmartFlower Solar produces unique, ground-mounted solar panel systems that include a sun tracker and a number of other high-tech features. This "smart" solar panel system is an all-in-one, self-sustaining system that differs greatly from the traditional monocrystalline or polycrystalline rooftop panels .

In a world filled with countless rectangular solar panels, Smartflower is a rare, novel solar product. Part energy system and part industrial art installation, it's essentially a huge flower...

We are proud of the revolutionary and efficient power behind the SmartFlower. Visit this page to learn more all the specs associated with the SmartFlower solar panel including cooling features, physical and safety specs.

The Smartflower, or Solar Sunflower, is a blend between solar panels and art. It is a photovoltaic (PV) system that has been incorporated to bring visibility to solar technology, and at the same time to enhance the ...

Smartflower stands out in the solar energy market with its distinctive design, blending functionality with artistic flair. This innovative product features a large, flower-like structure made of specialized solar panels that unfold like petals at dawn, follow the sun's path throughout the day for optimal energy absorption, and then close ...

The SmartFlower is a ground-mounted solar panel system designed to resemble and function like a sunflower. Its unique design--a form of biomimicry --allows it to track the sun's movement throughout the day, ...

The smartest solar solution ever made. SmartFlower uses advanced robotics and automation to intelligently track the sun, making up to 40% more energy than traditional stationary solar panels. In addition, every day at sunset, ...

The smartest solar solution ever made. SmartFlower uses advanced robotics and automation to intelligently track the sun, making up to 40% more energy than traditional stationary solar panels. In addition, every day at sunset, SmartFlower will automatically fold up and clean itself to maintain peak solar utilization.

The SmartFlower is a ground-mounted solar panel system designed to resemble and function like a sunflower. Its unique design--a form of biomimicry --allows it to track the sun's movement throughout the day, optimizing energy production.

SmartFlower is an all-in-one residential solar system that's easily installed by trained professionals (3-4 hours), offers a small footprint (approximately 5 feet square), cleans itself of dirt, dust and debris twice a day, is fully automated and basically maintenance-free.
