

Is there a sodium ion battery for home use?

In 2022, Bluetti announced a sodium ion solar battery for home use that is not yet available for sale, but is worth keeping an eye out for. Considering sodium ion batteries are not yet widespread, existing lithium ion solar batteries on the market are still great options for energy storage at home. What is a sodium ion battery?

Are sodium ion solar batteries still available?

Sodium ion offerings from most manufacturers are still being developed and are not yet widely available today. In 2022, Bluetti announced a sodium ion solar battery for home use that is not yet available for sale, but is worth keeping an eye out for.

What is a sodium ion battery?

A sodium ion battery uses sodium as a charge carrier. The internal structure of sodium ion batteries is similar to lithium ion batteries, which is why they are often pitted against each other. Sodium ion batteries are rechargeable just like lithium ion, lead acid, and absorbent glass mat (AGM) batteries. Learn more:

Can sodium ion batteries be used for energy storage?

2.1. The revival of room-temperature sodium-ion batteries Due to the abundant sodium (Na) reserves in the Earth's crust (Fig. 5 (a)) and to the similar physicochemical properties of sodium and lithium, sodium-based electrochemical energy storage holds significant promise for large-scale energy storage and grid development.

Are lithium ion batteries a good choice for a solar system?

Compared to sodium ion batteries, lithium ion batteries have been tested extensively and have a reliable track record in the solar industry. Cost is a major factor in battery technology adoption; they add several thousands of dollars to a solar system installation.

Why are sodium ion batteries becoming more popular?

Development for sodium ion batteries dates back to the 1980's and recently started picking up due to challenges with scaling lithium ion batteries, including rising material costs and the need to acquire large amounts of lithium to sustain battery production and demand.

In 2022, Bluetti announced a sodium ion solar battery for home use that is not yet available for sale, but is worth keeping an eye out for.
