

What is a solar power purchase agreement (SPPA)?

A Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host customer agrees to site the system on its property and purchases the system's electric output from the solar services provider for a predetermined period.

Can a provider sell a photovoltaic system to a customer?

WHEREAS, Provider has offered, at his sole cost and expense, to install, maintain, own, replace, repair, and operate a photovoltaic system at one or more of the Property (ies) and to sell Solar Services (as hereafter defined) produced by the solar photovoltaic system to Customer as provided in and subject to the provisions of this Agreement.

Do you need a solar power agreement?

These agreements can be related to a solar power lease, PPA, or outright buying of the system. Whenever developing alternate forms of power, it's good to have an agreement with your Provider. This ensures everyone is clear on their roles and responsibilities.

What is a solar power contract?

A solar contract is a signed agreement between a person and a solar power installation company that clearly outlines every part of the solar panel installation process, including the steps before, during, and after the actual installation, and who is responsible for each.

What should a solar power contract include?

The point of your solar power system is to generate electricity so you can reduce the amount you draw from the utility grid. This section of the contract should outline your average estimated energy production, or how much power your panels can produce. It may also include your annual home electricity consumption before installing solar.

What does a solar service provider do?

The solar services provider purchases the solar panels for the project from a PV manufacturer, who provides warranties for system equipment. The installer will design the system, specify the appropriate system components, and may perform the follow-up maintenance over the life of the PV system.
