

What will Prony resources New Caledonia do with solar energy?

Per a 25-year renewable power purchase agreement, the clean energy produced from the solar projects will supply power to industrial operations of Prony Resources New Caledonia. TotalEnergies will use its expertise in solar projects to build a 160-MW solar project, with the first phase of 30 MW expected to come online by 2023.

Will TotalEnergies build a 160-MW solar project in New Caledonia?

TotalEnergies will use its expertise in solar projects to build a 160-MW solar project, with the first phase of 30 MW expected to come online by 2023. Once this project is fully operational, it will be sufficient to meet 67% energy needs of Prony Resources New Caledonia and significantly lower carbon emissions.

How many solar panels does New Caledonia have?

Equipped with more than 58,000 solar panels, the plant has installed capacity of nearly 16 megawatts-peak (MWp), enough to cover the energy needs of over 21,000 residents of New Caledonia. The plant will feature a lithium-ion energy storage system (ESS) with a capacity of nearly 10 MW.

What will TotalEnergies do in New Caledonia?

Noumea, December 20, 2021 - TotalEnergies will develop a series of photovoltaic and energy storage projects in New Caledonia in order to deliver decarbonized electricity via a 25-year renewable power purchase agreement (PPA) for the industrial operations of mining and metallurgy consortium Prony Resources New Caledonia.

How does Prony resources contribute to New Caledonia's development?

A participant in the global energy transition, Prony Resources sustainably contributes to New Caledonia's development by processing its nickel and cobalt resources in accordance with the highest industrial and environmental standards.

Will solar power increase global electricity capacity by 2026?

Per International Energy Agency ("IEA") report, by 2026, global renewable electricity capacity is forecast to rise more than 60% from 2020 levels to over 4,800 GW. The IEA report predicts that renewables are set to account for 95% of the increase in global electricity capacity through 2026, with solar PV alone providing more than half.

In New Caledonia, we operate nine solar power plants and have started building four other plants and one windfarm. Specialty, petroleum and bio-based products In New Caledonia, we have interests in several depots and two storage companies, one of which is in Wallis and Futuna.

By combining solar energy and energy storage to replace electricity generated from coal, TotalEnergies is

demonstrating its ability to provide a sustainable energy solution to Prony Resources New Caledonia while meeting demanding local, industrial, environmental and social requirements.

Equipped with more than 58,000 solar panels, the plant has installed capacity of nearly 16 megawatts-peak (MWp), enough to cover the energy needs of over 21,000 residents of New Caledonia. The plant will ...

Total Quadran, a wholly owned Total subsidiary, has brought online its H&#233;lio Boulouparis 2, the second phase of the solar park which is the most extensive solar program ever carried out in New Caledonia. The first tranche, H&#233;lio ...

By combining solar energy and energy storage to replace electricity generated from coal, TotalEnergies is demonstrating its ability to provide a sustainable energy solution to Prony Resources New Caledonia ...

By combining solar energy and energy storage to replace electricity generated from coal, TotalEnergies is demonstrating its ability to provide a sustainable energy solution to Prony Resources...

Total Quadran now manages 7 solar power plants in New Caledonia with a cumulative capacity of 50MW. This latest New Caledonia solar project is the second Boulouparis project, joining a 11 MW project commissioned in 2017.

TotalEnergies will develop a series of photovoltaic and energy storage projects in New Caledonia in order to deliver decarbonized electricity via a 25-year renewable power purchase agreement (PPA) for the industrial operations of mining and metallurgy consortium Prony Resources New Caledonia.

By combining solar energy and energy storage to replace electricity generated from coal, TotalEnergies is demonstrating its ability to provide a sustainable energy solution to ...

Equipped with more than 58,000 solar panels, the plant has installed capacity of nearly 16 megawatts-peak (MWp), enough to cover the energy needs of over 21,000 residents of New Caledonia. The plant will feature a lithium-ion energy storage system (ESS) with a capacity of nearly 10 MW .
